Professional Summary

Aspiring Full Stack Developer and Data Science student pursuing dual degrees at IIT Madras and NIT Durgapur. Experienced in developing AI-powered and data-driven web applications using Flask, Machine Learning, and modern web technologies. Strong analytical and problem-solving abilities demonstrated through 1000+ algorithmic challenges and leadership experience across technical and cultural organizations. Interested in leveraging technology, data analytics, and software engineering to solve real-world business and operational challenges.

Education

Indian Institute of Technology, Madras

Sept 2023 – 2027

Bachelor of Science in Data Science and Applications

GPA: 7.03/10

Relevant Coursework: Machine Learning, DBMS, Business Analytics, Cloud Computing, DSA

National Institute of Technology, Durgapur

Aug 2023 – 2027

Bachelor of Technology in Civil Engineering

GPA: 7.14/10

Relevant Coursework: C programming, DSA in C, Artificial intelligence and Machine Learning

Technical Skills

Programming Languages: Python, C/C++, JavaScript, TypeScript, SQL, HTML/CSS

Web Development: Flask, Node.js, Express.js, React.js, REST APIs, Tailwind CSS

Data Science & Machine Learning: Pandas, NumPy, Scikit-Learn, TensorFlow, PyTorch, CatBoost

Databases & Cloud: MySQL, MongoDB, SQLite, AWS, Azure, Docker, Render, Git/GitHub

Projects

Smart Parking Management System (Web-Based)

[GitHub](#) [↗](#) [Live Demo](#) [↗](#)

- Developed a web-based parking management platform that automates vehicle booking, slot allocation, availability tracking, and release workflows to improve operational efficiency.
- Implemented database-driven allocation logic, secure authentication, booking history management, and responsive dashboards for real-time monitoring.

Tech Stack: Flask, SQLite3, Jinja2, HTML, CSS, Python.

AI-Powered Project Risk Prediction & Decision Support System

[GitHub](#) [↗](#) [Live Demo](#) [↗](#)

- Developed an end-to-end machine learning-powered decision support system that performs risk assessment for engineering projects using structural, environmental, financial, and operational indicators.
- Built automated data preprocessing and prediction pipelines with cloud deployment for project risk classification and decision support.

Tech Stack: Python, Flask, CatBoost, Scikit-Learn, Pandas, NumPy, Jinja2, HTML/CSS, Gunicorn, Render, Git/GitHub.

Business & Analytics Exposure

- Coursework in Business Analytics, Database Management Systems, Machine Learning, and Cloud Computing.
- Developed predictive analytics solutions for project risk assessment and operational decision support.
- Familiar with data-driven decision making, KPI analysis, and statistical modeling workflows.

Achievements

◦ **CodeChef: 2 Star**

[CodeChef \(view\)](#) [↗](#)

◦ **LeetCode: 1700+ rating**

[LeetCode \(view\)](#) [↗](#)

◦ Completed over 1000 algorithmic challenges on platforms including [Leetcode](#) [↗](#), [CodeChef](#) [↗](#)

Position of Responsibility

Interact Club , NIT Durgapur

Joint Secretary, 2024- Present

- Developed strong communication, public speaking, stakeholder management, and teamwork skills through participation in national-level fests and competitions.
- Developed skills in public speaking, live performance, audience engagement, and working effectively under high-pressure, time-bound environments in various fests across IITs like IIT KGP , IIT Dhanbad , IIT Patna , etc.
